Acknowledgement

I thank my teachers and mentors for guidance. I also thank my peers for support during development.

Abstract

This project is a responsive college website developed for IIMM Ayodhya. It provides information about courses, events, announcements, achievements, and faculty. The website is designed using modern web technologies to ensure accessibility, responsiveness, and ease of use.

Introduction

Educational institutions need a digital presence to share information efficiently. This project focuses on building a structured website for IIMM Ayodhya that improves communication between students, faculty, and visitors.

The website displays institutional data in an organized and user-friendly format.

Objectives

- Provide an online presence for the institute
- Display course and academic details
- Show announcements and events
- Build a responsive UI
- Improve accessibility for users

Scope of Project

- Useful for students and visitors
- Can be expanded with backend
- Supports mobile and desktop
- Can include admission system later

Existing System

- Information shared offline
- Limited accessibility
- No centralized platform

Proposed System

- Web-based system
- Easy navigation
- Centralized information
- Accessible anytime

Technologies Used

- HTML5
- CSS3
- Bootstrap 5
- JavaScript
- Font Awesome

System Design

Architecture

- Frontend-based static website

Design Features

- Responsive layout
- Modular sections
- Clean UI

Modules Description

Home Page

Displays introduction, banners, and highlights

Navigation Bar

Links to different sections

Announcement Section

Shows latest updates

News Section

Displays institutional news

Courses Section

Shows available courses

Achievements Section

Highlights achievements

Gallery Section

Displays images

Team Section

Shows committee members

Events Section

Displays upcoming events

Footer

Contains contact details

Implementation

- Created structure using HTML
- Styled pages using CSS
- Used Bootstrap for layout
- Added icons using Font Awesome
- Integrated images and sections

Testing

Functional Testing

- All links work properly

UI Testing

- Layout is consistent

Responsiveness Testing

- Works on mobile and desktop

Advantages

- Easy to use
- Responsive design
- Fast loading
- Structured layout

Limitations

- No backend
- No login system
- Static content

Future Scope

- Add login system
- Database integration
- Online admission form
- Admin panel
- Dynamic content
- SEO optimization

Conclusion

The IIMM Ayodhya website provides a structured and responsive platform for sharing institutional information. It demonstrates strong frontend development skills and can be expanded into a complete web system.
